

IFR Workshop And RFS Safety Seminar

You are likely familiar with METARs, TAFs and other common weather tools. But what about Prog Charts, Lifted K Index and other weather tools? There is a wealth of information available from a variety of sources but not helpful unless you use them properly.

Directions: Located at the Renton Municipal Airport. This seminar will be held in the Rainier Flight Service classroom.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
