

FAASTeam presents:

Instrument Pilot Refresher

This is a fun, interactive program that gives you all the information you need to get instrument current again. Our dynamic presenters will bring you up to speed on hot-button issues like weather briefings, preflight planning, avionics, and instrument procedures. You'll leave the seminar armed with knowledge to apply to an Instrument Proficiency Check. The goal of this presentation is to take the next step and get back to flying IFR.

Directions: We are located on the west side of the Renton Municipal Airport, north of the tower. Once you are on Perimeter Road, turn in when you see the oval army-green Quonset hut, pull forward and you'll be in our little parking lot. There is a blue awning over our front doors. The seminar is location inside Rainier Flight Service in the back classroom. Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.
