

Winter Flying

As the seasons change, so do our considerations preparing for a flight. Join us for a discussion on winter flying including a refresher on weather analysis, ground/in-flight icing, cold starting techniques and MVFR aeronautical decision making. You will leave the seminar more confident flying through the winter in Seattle.

Directions: We are located on the west side of the Renton Municipal Airport, north of the tower. Once you are on Perimeter Road, turn in when you see the oval army-green Quonset hut, pull forward and you'll be in our little parking lot. There is a blue awning over our front doors. The seminar is location inside Rainier Flight Service in the back classroom. Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.
