

Arlington Non-Towered Traffic Pattern Operations

While this seems like basic information we learned in PPL course, you may not be aware that much changed effective in 2017. Tom Rogers will give a presentation that covers the current regulations and best practices published by the FAA. The presentation will discuss the non-towered pattern, entries, exits, right of way, and wrap it up with his Master CFI suggestions for keeping safe in the busy summer pattern.

Directions: Fly or drive, parking for cars on 59th Dr side of building, aircraft parking on transient ramp East of RWY 34

A message from the National FAASTeam Manager
