

Non-Towered Airport Operations, Arlington KAWO

While this seems like basic information we all learned in our PPL course, you may not be aware that much has changed effective in 2017. Tom Rogers will give a presentation that covers the current regulations and best practices published by the FAA. The presentation will discuss the Non-tower pattern, entries, exits, right of way, and wrap it up with his master CFI suggestions for keeping safe in the busy summer pattern.

Tom has been flying for almost 50 years, is a retired Lt Colonel and F15 fighter pilot from the USAF, Retired Captain for Alaska Airlines, and a National Association of Flight Instructors Master CFI. He also holds CFII, MEI, has thousands of hours of instruction, and over 24,000 hours of flight time in hundreds of different aircraft. Currently he teaches tailwheel ops, Spin training, and UPRTraining and is a FAA Safety Team Rep at the Bremerton airport.

Presentation is sponsored by The Arlington Airport and FAAST. Wings credit will be available for the attendees. Pre-register at FAASAFETY.GOV or just sign in at the presentation. Your email will be needed to give you credit for Wings.
