

FAASTeam presents:

# IMC Club Monthly Meeting - Bremerton

When a relatively inexperienced, yet 'confident', instrument-rated pilot... on a mission... takes a complex, high performance airplane... on a long cross-country flight... over very unforgiving terrain... in marginal weather...

What could possibly go wrong?

We'll discuss IFR regulations, along with some IFR planning and execution 'traps', and how they might affect your ADM. We'll also look at what could happen if you have too many options, and you end up confronted with the classic "What is Safe/Smart vs. What is Legal" dilemma.

IMC Club (Tacoma Narrows-PWT) meets monthly for guided discussions (also known as "hangar talks") focused on real scenarios which call for tough decisions in the real world IFR environment. As we discuss the monthly scenario, we share ideas and safety tips on how best to deal with specific IFR challenges. Our objective: continually improve proficiency in IFR flying for pilots at ALL experience levels. This is a true participative discussion seminar and NOT just another one-sided lecture. This seminar is eligible for WINGS Credit through the FAASTeam.

Pilots of all skill levels and experience from student pilot to ATP are welcome. IMC clubs are sponsored by EAA, which provides the training

## Event Details

**Sat, Feb 4, 2023 - 09:00 PST**

**Bremerton Airport**

8850 WA-3

Bremerton, WA 98312

**Contact: ERIC JACQUES RUBEL**
