

Non-Towered Traffic Pattern Operations

Non-Towered traffic pattern operations changed in 2017. The FAA has made many updates to the guidance on operating at non-towered airports. This presentation, which has been given in-person and online sponsored by the FAA Safety Team in 2022, has been updated with new information and examples.

Directions: Room will be assigned by Clover Park on the day of the event. They will have signs directing attendees to the correct room from the only parking area.

A message from the National FAASTeam Manager
