

FAASTeam presents:

IMC Club Monthly Meeting - Bremerton

IMC Club (Tacoma Narrows-PWT) meets monthly for guided discussions (also known as "hangar talks") focused on real scenarios in the real world IFR environment. As we discuss the monthly scenario, we share ideas and safety tips on how best to deal with specific IFR challenges. Our objective: continually improve proficiency in IFR flying for pilots at ALL experience levels. This is a true participative discussion seminar and NOT just another one-sided lecture. This seminar is eligible for WINGS credit through the FAASTeam.

Our topic this month is How GA Pilots can best work with ATC in the IFR system which is often very challenging, busy, and somewhat intimidating at times. We will have two ATC controllers participating in our discussion, going over scenarios with us and being available for questions and answers. Should be loads of fun - learning more about ATC, the tools they have available, the flows/procedures they use, and how we as GA pilots can fully and efficiently tap into the ATC resources available when we need them. The more we know about ATC, the easier it becomes to work with them as a team!!

Pilots of all skill levels and experience from student pilot to ATP are welcome. IMC clubs are sponsored by EAA, which provides the training
