

VMC/IMC-WPA Paine Field Monthly Safety Forum

Safety and education scenarios are actively discussed in a forum setting for both VFR and IFR pilots.

Current topics and scenarios related to safety of flights in VMC and IMC conditions are presented each month. **"What would you do, and why"** discussions provide insights and knowledge through active audience participation. The forum is led by experienced CFI's.

This month topics are: an IFR departure with a gear malfunction adversely affecting climb performance, and an engine failure on take off in VFR conditions at a busy airport.

Simulation Flight is in office park across the street from Boeing's Future of Flight at KPAAE.
