

VMC/IMC-WPA Paine Field Monthly Safety Forum

Current topics and scenarios related to safety of flights in VMC and IMC conditions are presented each month. **"What would you do, and why"** discussions provide insights and knowledge through active audience participation. The forum is led by experienced CFI's.

This month there will be two scenarios to discuss:

For the VFR scenario: Departing VFR in the dark just as the tower opens and discover another plane is preparing to land creates an challenging situation.

For the IFR scenario: Departing IFR into low IMC results in confusion when flying a localizer back course in mountainous terrain.

Propeller Aero is opposite the main terminal at KPAE.
