

## Weather Cameras for Flight Planning - 2025 NW Aviation Conference

The FAA Weather Camera Program has added a dimension to weather reporting for general aviation. A constellation of cameras located at airports and other key locations, capturing images every ten minutes, is enhancing our ability to assess the weather. Made available at a growing number of locations across the country, this information source should be a part of every pilot's pre-flight planning routine. This presentation will give an overview of the system, share examples of how it can augment conventional AWOS and ASOS reports, and provide a look at ways the system could be further enhanced to increase aviation safety.

The Washington State Fairgrounds are located in Puyallup, WA, just north of Highway 12, at Meridian & 9th Ave. Enter the fairgrounds at the Blue Gate. There is free parking in the Blue Lot, across from the Blue Gate at Meridian and 10th Ave.
