

2012 Aviation Weather for Pilots

Six classes are planned for 2012 to help pilots of all levels better understand the atmosphere and aviation weather. Sessions include: theory and classroom lecture, sample flight-planning scenarios and aviation accident reviews where weather has been a causal factor.

Please join us for these informative sessions on the following dates below. All classes are held at Independence Aviation, Centennial Airport (KAPA) and run from 9:00 a.m. until noon.

February 18	Aviation Weather Fundamentals
April 21	Spring Weather Hazards
June 16	Summer Weather Hazards
August 11	Aviation Weather Decoded
October 20	Winter Weather Hazards
December 15	Mountain Flying

**To register for classes, call Independence Aviation 303.858.1600
