

Flying in Harmony with Birds and Wildlife

Airports are not only home to our airplanes, but they happen to be home to birds and other wildlife. There are times we do not always mix well with them. In this seminar we will discuss the behaviors of the birds and wildlife common to the airport environment, look into the hazards they present to aviators and learn how to best minimize the risks they create. Additionally, we'll look into FAA reporting procedures when aircraft encounter these threats. The evening will utilize information and lessons learned in numerous past incidences to see how to minimize your risk.

Directions: The Ramada Inn is immediately to the northeast of the Centennial airport Control Tower. Seminar is in the Arapahoe conference room.

A message from the National FAASafetyTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
