

FAASTeam presents:

The Hazards of Winter Weather

Weather is among the most important elements in the go/no go decision for flying. You can't have too much weather education.

This seminar will delve into the upcoming Winter flying weather conditions.

Directions: Centennial Interport is located on the south side of Centennial Airport. There are two ways to get there. A map is available below.

The easiest access is via E-470 from I-25, exit at Peoria Street, proceed northbound to County Line Road (Peoria ends), then left and around the curve to the Signature Flight Support building.

From the north entrance to Centennial Airport, continue on Broncos Parkway to Chambers Road, turn right to Potomac Street and turn right. Potomac turns into County Line Road and then into Interport Boulevard.

Park in the big lot east of the building, and enter the building at the east entry. Take the elevator to the third floor to suite 350.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
