

## Teaching Crosswind Landings

Crosswind landings are one of the leading real-world weather related cause of accidents in General Aviation. How can aviation educators improve their knowledge and teaching of this fundamental skill? Brad Whitsitt, inventor of the XWind simulator now produced by Redbird Flight Simulations, will conduct an instructor-only forum where questions about training and resources will be answered.

**Directions:** From US 36 and US 287 (Wadsworth) go south to Interlocken Loop. Turn west to Airport Way and proceed south. Go past the stop sign and watch for the Independence Aviation building on the right.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
