

## Thunderstorm Hazards

For most, summer flying means thunderstorms. With them comes lightning, hail, strong winds (including updrafts/downdrafts), torrential rains, low visibility and even tornadoes. In our first Weather Clinic Confidential webinar, let us reacquaint you with thunderstorms. We'll help you better understand the environmental conditions required for thunderstorms; the various cloud types and development stages; and show you how to get more from all the thunderstorm forecasting, reporting and detection tools at your disposal.

**Directions:** On the grounds of AirVenture 2015, the EAA Proficiency Center is located on W. Waukau Ave. between Knapp St. and Airport Drive.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
