

FAASTeam presents:

Pilot / Controller Forum

Air traffic controllers provide vital radar services to make our VFR flights safer and our IFR flights even possible. Here is your chance to meet some of the people on the other side of the pilot/controller partnership!

In this informal group discussion, we will meet and talk with controllers working in various ATC roles and sectors. They will talk about the various services available to pilots by Air Traffic Control, and how proper phraseology and professionalism impacts General Aviation. We will learn some tips on how to operate better within the National Airspace System to make your next flight even safer. Finally, we will focus on dispelling some common myths that pilots have about controllers and the ATC system.

This is a great opportunity to get your ATC questions answered!

Directions: Aspen Flying Club is located in the Denver Jet Center East building at Centennial Airport KAPA. Follow Peoria Rd until it meets the control tower, then take the 2nd exit off the roundabout onto eastbound E Control Tower Rd. Aspen Flying Club is on the right side, with ample parking in front of the building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
