

Traffic Two O Clock Three Miles Type Unknown

Pilots are responsible for seeing and avoiding air traffic. Visual scanning for traffic is the most common means to avoid collision. Pilots must commit to maintaining an effective traffic scan throughout each flight. Complacency and distractions can severely compromise traffic scanning effectiveness. ATC may provide separation services and assist in identifying traffic but the Pilots are primarily responsible for collision avoidance. ATC may issue Visual clearances to follow or avoid aircraft. When operating on Visual Clearances pilots must keep the referenced traffic in sight or, if they lose sight of the traffic, they must immediately inform ATC. There are numerous Collision Avoidance technologies available to GA Pilots.

**Representative THOMAS FRANK
SLAVONIK n/a**

From Highway 50 East or West, use the right lane to take the ramp to Pueblo Memorial Airport. Turn towards the north on Paul Harvey Boulevard. Before the traffic light, bear to the right to stay on Paul Harvey Boulevard and merge onto West United Boulevard. Use the 2nd from the left lane to turn left onto Keeler Boulevard. Take Keeler Boulevard to the end and park in the large parking lot in front of Freeman Jet Center. Walk across into the front entrance of the Terminal Building and turn left. Walk straight back and turn left by the baggage claim area. Continue straight through a glass door and take the elevator to the 2nd floor. Someone will be there to direct you to the meeting room.
