

## Aviation Safety Seminar

What mechanical work on airplanes is permitted to be done by operators and owners? Find out from the experts! Also, Automatic Dependent Surveillance-Broadcast (ADS-B) is a new technology that helps pilots see other aircraft. It allows air traffic controllers to see air traffic with greater precision than radar even in remote areas or mountainous terrain.

**Directions:** Fagerberg Building Room 70; at the corner of 7th and Bernard. From Highway 14A (Coulter Ave.) turn north on Bernard Street.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
