# Operations at Non-Towered Airports, Special Use Airspace

Wednesday, September 24, 2008 at 7:00 pm

**Ravalli County Administration Building  
215 South 4th St.  
Hamilton, MT**

Contact: STEVE JERRY JONES  
(406) 449-5270  
steve.j.jones@faa.gov

This pilot safety education meeting provides the opportunity to review procedures and stresses the need for common courtesy for all types of airport operations at non-towered airports. Review the techniques required to safely fly in the traffic pattern. Learn the two basic uses for CTAF and the when, what, and how of proper communications. Midair collisions are the primary hazard associated with flying at non-towered airports. This event meets the elective knowledge requirements for the new WINGS program.

*Directions:* From US-93 south to Hamilton turn right on West Main Street and turn left on South 4th.

*Message from the National FAAS Team Manager:*

**FAAS Team CFI Workshops start this Fall. Watch for them in SPANS...**
