

FAASTeam Flight Instructor Open Forum

The CFI Forums present very important subjects regarding main causes of General Aviation accidents. Main topic: "Spins" -- Recognition, Recovery, Prevention. 'What's happening out there'. Also, material regarding "Conducting an Effective Flight Review" and our open discussion on better risk management and decision making practices for all pilots. We need to teach these "live saving habits".

Directions: Note new meeting room. Drive to the Missoula Airport parking lot. Meeting room located on the main floor of the terminal building.

A message from the National FAASTeam Manager

Over 136,600 pilots earned WINGS credits last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
