

Courage, Complacency, and Compliance

Why do pilots, who are known to be safe, experienced, and “good sticks” do dumb things while flying. Why does a pilot experience an incident or even crash during a routine flight. The insidious condition of complacency leading to non-compliance and the courage required to maintain standards will be discussed.

Directions: Directions: Enter airport grounds, head northwest to Hangar 49.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
