

High Altitude and You

We live and fly in the "high country". That means the partial pressure of oxygen is less than at sea level. A lack of oxygen affects the human condition. Hypoxia may be subtle and catch you off guard. Be prepared. Come and learn from Doctor Robins just what hypoxia is, its basic symptoms and what you can do about it.

Directions: Enter airport grounds, through the security gate then head northwest to Hanger 49. Call for security code if you need to (see "Contact Info").

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
