

Maintenance: What Pilots need to know beyond ARROW

Maintenance- the process of preserving someone or something. Preserving what or who is the question. Come to the March Safety meeting and discuss what pilots need to know beyond ARROW to stay 'preserved'-that is airworthy. The pilot thus being armed to make a rational decision that the “someone” and the “something” (OK... the pilot and the aircraft) are fit to fly-i.e. airworthy. Specifically the discussion will cover the following topics: 1. Airplane Airworthiness 2. Pilot Airworthiness 3. Weather Airworthiness 4. Planned flight is airworthy

Directions: Directions: Enter airport grounds, through the security gate then head northwest to Hanger 49. Call for security code if you need to.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
