

## Advanced Preflight after Maintenance

Brief Description of Event: Did you know that maintenance-related problems are one of the most deadly causes of accidents in general aviation? Contributing to this is a pilot's failure to identify maintenance discrepancies because of a lack of knowledge and improper techniques used during the preflight of the aircraft. Come on out for a discussion concerning mistakes during aircraft maintenance and the possible effects of those mistakes on the aircraft and pilot during flight. Several aircraft events relating to improper maintenance will be discussed along with one in-depth event that fortunately did not end in an accident!

**Directions:** Commemorative Air Force Hangar

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
