

FAA Compliance Philosophy

All pilots and mechanics are responsible for safety within the National Airspace System and to comply with FAA Regulations. The FAA depends on airmen to voluntarily comply with regulations and do their part to promote safety. It is also important to promote a 'Just Culture' where airmen willingly share information with the aviation community about deviations from regulatory standards in the interest of improving safety without fear of retribution. A Just Culture does not penalize an airman for sharing safety information that could be used to improve the NAS. Click on the link below and register TODAY!

Directions: Apex's class room is upstairs above the office.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
