

The Mid Air Aircraft Collision That Changed the Way We Fly

A power point program by Bill Marvel. Our current air traffic control system has evolved over time. Prior to 1956 radar coverage, radio communication was fragmented, indirect and limited. The story of this accident was the impetus to put air traffic control on the path to our current system.

Directions: Horizon Drive to Grand Junction Airport. Take 1st right in Traffic Circle to Aviators Way. Someone will be at the gate to let you in. Then down Aviators Way to end and CAP Hangar.

A message from the National FAASTeam Manager
