

Pilot/Controller Open Forum

Come out in person for a town hall style meeting with representatives from SLC TRACON, SLC Tower, and PVU Tower air traffic control facilities. Representatives from these facilities will be on hand to answer any questions you might have and talk about experiences.

We would like to discuss issues arising from the close proximity of SPK and PVU, climb gradient issues on the published departures, and give pilots a chance to ask their questions about operations. Conversations will also include topics like Radio Communications, practice approaches, traffic pattern work, tips and tricks, as well as discussions on ground movements and expectations for operating and communicating around both airport surface areas.

An in person seminar. Enter the main building and proceed to Classroom C located on the second floor. Please ask front desk if unsure where to go.

A message from the National FAASTeam Manager
