

Engine Running Rough so What Would You Do?

Hangar flying at its finest!

These sessions provide a scenario for open discussion to promote safety and build proficiency. While participants may have different experience levels with different aircraft capabilities, everyone can benefit from an open exchange to improve skills!

Each scenario starts with a short video; which ends with, "So, what would you do?" This is where it gets interesting, with all levels of experience adding to the discussion.

About 1 hour for discussion.

WINGS Credit is available for the seminar.

Travel via I-215 to the 700N exit, east side of KSLC; turn west, at the traffic light, turn left on to 2200W; head South. About 300 ft on the west side, turn right; 1 block turn left. You're there!

A message from the National FAASTeam Manager
