

Positive Safety Culture

A positive safety culture begins with a desire for and a commitment to safety excellence. The culture continues to expand after your organization learns to watch for problems that arise in the normal course of business and to identify trends or areas of concern. Managers dedicated to safety do not take anything for granted. They are ready to meet emerging challenges and resolve the issues safely.

The maintenance seminar will be held in the maintenance hanger at FLT Academy. Enter into the main lobby and let them know you are there for the seminar.

A message from the National FAASTeam Manager
