

## Making an Informed IFR Weather Go/No Go Decision

With the advent of Foreflight, [Aviationweather.gov](https://www.aviationweather.gov) and a myriad of other weather tools, there has never been more data available to make the Go/ No Go weather decision. While a quick review of Foreflight's briefing output for local VFR flights may be sufficient, making the IFR decision, during dynamic weather, can add to the complexity of making the Go/No Go decision.

This presentation will utilize a case study, with actual weather data, to demonstrate a method to make the Go/No Go decision. This method enables the pilot to capture key weather data, including cross checking Foreflight and [Aviationweather.gov](https://www.aviationweather.gov) to make a comprehensive weather decision. A visual 3-strike rule will aid in making this all-important decision.

### Event Details

**Fri, Aug 15, 2025 at 18:00 MDT**

**SLC Airport Activities and  
Training Center**

1911 North 2200 West

Salt Lake City, UT

**Contact: JAMES CHRISTOPHER  
MADDEN**

**(541) 944-6689**

**jamie@jamiemadden.net**

**Select #: NM07138491**

**Representative JAMES  
CHRISTOPHER MADDEN n/a**

Proceed through the vehicle gate into the parking lot on the south side of the facility. Enter the main doors from the south side.

**A message from the National FAASafety Team Manager**
