

Making an Informed IFR Weather Go/No Go Decision

With the advent of Foreflight, Aviationweather.gov and a myriad of other weather tools, there has never been more data available to make the Go/ No Go weather decision. While a quick review of Foreflight's briefing output for local VFR flights may be sufficient, making the IFR decision, during dynamic weather, can add to the complexity of making the Go/No Go decision.

This presentation will utilize a case study, with actual weather data, to demonstrate a method to make the Go/No Go decision. This method enables the pilot to capture key weather data, including cross checking Foreflight and Aviationweather.gov to make a comprehensive weather decision. A visual 3-strike rule will aid in making this all-important decision.

Event Details

Thu, Jan 29, 2026 at 18:00 MST
Salt Lake City Airports Building
1911 North 2200 West
Salt Lake City, UT

Contact: REX SHOELL

(801) 436-7206

rexfaast@gmail.com

Select #: NM07140678

**Lead Representative REX ALAN
SHOELL n/a**

The building is located at the North end of the Salt Lake City Airport; just across from Red Rock Medical Supply. Proceed through the vehicle gate into the parking lot on the south side of the facility. Enter the main doors from the south side.
