

Human Factors - The Final Frontier

Human errors account for approximately 80% of aviation accidents. We have made a lot of progress with accident rates steadily declining over time to the present day. To drive accident rates even lower, we have to improve our understanding of human capabilities and limitations.

This presentation will give an overview of how human factors affect our flying and how modern safety management systems and the WINGS program optimize the relationship between pilots, their aircraft and the environment they fly in.

Colorado Flight Center is located within the WestStar Campus area at Grand Junction Regional Airport, in the building adjacent to the main WestStar FBO building. Proceed up the outside stairs to the top floor.

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to <https://www.wingsindustry.com/WINGS-Sweepstakes> for more info. Join us on Facebook: <https://www.facebook.com/groups/GASafety/>
