

Aircraft Maintenance and Inspection Records

Whenever inspection, maintenance, preventive maintenance, rebuilding, or alteration work occurs on an aircraft, airframe, aircraft engine, propeller, appliance, or component part, a maintenance or inspection record entry must be created. The importance of compliance with this requirement cannot be overemphasized. Qualified persons who perform inspections, maintenance, preventive maintenance, and alterations shall make a record entry of this accomplishment, thus maintaining the validity of the Certificate of Airworthiness. Adequate aircraft records provide tangible evidence that the aircraft complies with the appropriate airworthiness requirements.

The maintenance seminar will be held in the conference room located in the maintenance hangar.
