

Safety Management System

An SMS is an organization-wide, comprehensive, and preventive approach to ensuring system safety. An SMS includes a safety policy, promotion of a positive safety culture, formal methods for identifying hazards and mitigating risk, and assurance of the overall safety performance of aviation organizations. An SMS is intended to be designed and developed so the aviation organization's employees are able to manage risks as a part of the operations and business decision-making processes. An SMS assists an aviation organization's leadership, management teams, and employees in making effective and informed safety decisions.

Enter the building and ask for the maintenance department.

A message from the National FAASTeam Manager
