SLC-FSDO FAASTeam presents:

FAA Form 337 and Field Approvals

A field approval is one of the means used by the FAA to approve technical data used to accomplish a major repair or major alteration. It is an approval by the Administrator, through an authorized Aviation Safety Inspector (airworthiness), of technical data and/or installations used to accomplish a major repair or major alteration. Technical data so approved becomes "technical data approved by the Administrator." This type of approval may be accomplished for one-time approval.

We will discuss the need for a field approval and what information is required when completing an FAA Form 337.

The building is located in the southwest corner of the parking lot.

A message from the National FAASTeam Manager
