

FAASTeam presents:

Using an iPad for Aviation

Find out about the latest applications and accessories for the iPad or iPad wana-be. Tips and no-no's in the cockpit will be discussed.

Curt Anderson has been flying paperless for the last seven years. As an employee of FlightPrep, the programmers behind DUATS GoldenEagle and ChartCase software, he has been on the cutting edge of moving maps beginning with PCs and moving on to iPads. He has been using his iPad for the last year and a half for charts in the cockpit. Curt has been a presenter at six Sun 'N Funs, and six AirVentures, as well as Puyallup, Arlington and Eugene. He is a retired math and computer teacher.

Directions: In the hangar at Nutsch Aviation.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
