

Uncontrolled Does Not Mean Out-of-Control: Non-Towered Airport Operations

A big part of aviation is safety through risk management and regulation, professionalism, and courtesy. This is especially true when operating in a non-towered airport environment. This seminar will include a presentation on recommended airport procedures from the AIM as well as local procedures from the airport management. Runway safety and time for discussion are also part of this seminar.

Directions: Gibson Air Service is located in the second hangar south of the airport terminal.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
