

Pilot Myths about Air Traffic Control

Air Traffic Controllers seem like a booming voice from above to many pilots. Come discover the truth behind the myths. Portland's air traffic control team manages busy airspace full of helicopters, jets, and small piston powered airplanes. How do they manage the chaos? A real life air traffic controller will be dispelling myths generally held by pilots. Come and enjoy hearing stories from ATC's point of view.

Directions: Please join us in the upstairs classroom on the second floor of Aero Maintenance Flight Center.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
