

FAASTeam presents:

# **2016 Wings Over the Willamette Independence Fly In and Vans Homecoming**

Portland FSDO Operations Inspector Joe Mollahan, and local CFI Robin Reid will discuss the Additional Pilot Program for Phase I Flight Test. Based on extensive reviews of Experimental Kit-Built Aircraft accident data, It is clear that an additional pilot can help reduce the accident rate during Phase I testing. Based on a review of the data collected, by addressing the risk associated with a powerplant failure through proper means, the additional pilot, if properly suited for the role, could mitigate the potential for Loss of Control as well as a number of the remaining causal factors comprising the last third of the accidents. Therefore, the FAA has created the APP that specifies:

Applicant, aircraft, and powerplant eligibility.  
The testing requirements necessary to mitigate powerplant issues.

Qualifications of an additional pilot.

An initial cadre of tests done early in Phase I that can be used to ensure that the aircraft and builder/owner have reached experience levels that will reduce LOC-related accidents.

Guidance material describing and emphasizing the importance of Crew Resource Management (CRM), including division of duties and tasks during flight test to enhance safety.

## Event Details

**Sat, Aug 13, 2016 - 15:30 PST**

**Independence Airport**

4905 Airport Rd

Independence, OR 97351

**Contact: CURT JOHANNES COWLEY**

**(503) 615-3279**
