

FAA Safety Team presents:

The IFR Nerdfest

Are you getting ready to take the knowledge test for your Instrument Rating? Or do you have your IFR ticket, but suspect you're not quite as sharp as you used to be?

At this month's Second Saturday Seminar, Willamette Aviation CFII Dick Oman will present our occasional "IFR Nerdfest," with a review of critical IFR concepts. Some parts of the IFR system are straightforward, others obscure, and plenty tend to provoke a lot of discussion. Know the difference between and ILS and an LDA? Or under what circumstances you can descend below MEA? Think you know all there is about holding-pattern entries, and when to use which types? Don't miss this one — we're looking forward to it!

Directions: DRIVE IN - Two miles south of Wilsonville, just off I-5. 1/4 mile south of Arndt Rd.
FLY IN - Taxi to the very north end of the Aurora airport. Park on the ramp between the fuel island and the FBO building.
AVOID OVERFLYING POPULATED AREAS.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
