

ATC and You Communicating with Confidence and Clarity

Communicating with air traffic controllers can be intimidating if you don't know the language. Instead of avoiding it, pilots can learn what they need to know to fly safely and efficiently in controlled airspace. This class will give participants the knowledge and insight they need to do just that. Presented by current Air Traffic Controllers from Center's, TRACON's, and Tower's. Attendees are welcome to engage in Q&A.

Directions: We are located across the street from the Control Tower.
Prior to attending a safety seminar, please review and abide by current CDC, State and Local health guidelines.
