

## ATC and You - David Versus Goliath - Size Does Matter

It can be intimidating in our small general aviation aircraft to share airspace with the "Larges" and the Heavies". Those concerns are valid, wake turbulence is a real thing. In this class, we will explore the methods ATC uses to help aircraft of all sizes avoid this big risk inherent in aviation. This presentation will be given by controllers from Centers, TRACONs, and Towers. There will be time for Q&A.

**Directions:** We are located cross the road from the Control Tower.
