

ATC and You - Dont Let That Cloud Fool You

Who has a more accurate weather picture, ATC or Pilots? Both have pieces to the weather puzzle, but both have their limitations. This class will discuss what pilots can expect from ATC. Controllers can help pilots avoid inclement weather. Come learn how. This presentation will be given by controllers from Centers, TRACONS, and Towers. There will be time for Q&A.

Directions: We are located cross the road from the Control Tower.
