

ATC and You - Communicating with Confidence and Clarity

Communicating with air traffic controllers can be intimidating if you don't know the language. Instead of avoiding it, pilots can learn what they need to know to fly safely and efficiently in controlled airspace. This class will give participants the knowledge and insight they need to do just that. This presentation will be given by controllers from Centers, TRACONs, and Towers. There will be time for Q&A.

Directions: We are located across the road from the Control Tower.
