

Air Traffic Control- Aviations Best Kept Secret

Sometimes ATC is a misinterpreted profession by pilots and the flying public. In this class, we will share information such as what comprises the air traffic system and what it's like on the ATC side of the mic. During this hour, participants can ask questions about why controllers do what they do and even debate us on the claim of being the best job in all of aviation. This presentation will be given by controllers from Centers, TRACONS, and Towers. There will be time for Q&A.

Directions: We are located across the road from the Control Tower.
