

Portland FSDO presents:

Second Saturday Seminar at Willamette Aviation

Pacific Northwest pilots are familiar with our seasonal weather patterns — hot, dry summers that are followed by a parade of storm fronts during the winter months, and then a spring flying season with a mix of VFR and rainy days. At this month's Second Saturday Seminar, National Weather Service Meteorologist Rebecca Muessle will drop by to discuss Pacific Northwest Weather. Rebecca holds degrees from Portland State University and the University of North Dakota, and she was a forecaster with the NWS in Anchorage, Alaska for two years before returning to Oregon. At this month's event she will discuss weather patterns in our flying region, and specifically how local pilots can use forecasts for effective flight planning. There are plenty of flying months between now and summer, so don't miss this one!

This month's Second Saturday gets underway on Dec. 10 at 1100 in the Education Hangar at Willamette Aviation. The event is certified for FAA Wings credit and there is no charge — drop by or sign up on the Wings website to save your spot. After the event, everyone is welcome to stick around for this month's Apple Pie Social. We'll be serving hot apple pie and other treats. We'll see you there!
