

FAASTeam July 2023 Topic Of The Month - Fly The Aircraft First!

Background:

NTSB accident data strongly suggests that distractions, poor decision making and inappropriate responses to in-flight situations are key precursors to loss of control accidents.

Pilots must maintain aircraft control at all times (aviate). Then take the time to restore situational awareness (navigate), and only then worry about talking to ATC or whomever (communicate). In other words: *Fly the Aircraft First!*

Learning Points:

- Understand the impact of distractions, poor decision making and inappropriate responses in aircraft accidents.
- Information on prioritization and dealing with distractions.
- An alternative definition of proficiency.

Bateman n/a**

This—and more—will be covered in this interactive, in-person safety session, and you'll receive *WINGS* credit for attending!

Join us at the EAA Chapter 617 monthly in-person meeting for a hearty breakfast at 8:00am (donation appreciated), followed at 9:00am by a strong dose of *WINGS* aviation safety.

THIS IS AN IN-PERSON SEMINAR—NOT A WEBINAR. IT WILL NOT BE RECORDED!

Flying:

Use an airport/taxiway diagram and [check NOTAMs!](#)

Taxi to the main ramp. Exit through the terminal building or gate. Walk to the hangar via the road.

Driving:

Exit the OR-126 roundabout onto Tom McCall Road, then a quick left onto SW Aviation Blvd.

Drive ahead and then around the right-hand curve to the stop sign. FAA Chapter 617's hangar is in front of you, slightly to the left. Please do not block any hangars!

Prior to attending this seminar, please review and abide by current CDC, state, and local health guidelines.

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to <https://www.wingsindustry.com/WINGS-Sweepstakes> for more info. Join us on Facebook: <https://www.facebook.com/groups/GASafety/>
