

SUMMER SAFETY BRIEFING and BBQ

It's tempting to think that detailed flight planning is the best way to mitigate risk, but even the best plans don't always expect the unexpected. **Aeronautical Decision Making** is the mental process that pilots must use in order to take the best course of action during a flight, particularly when circumstances change. At this month's Pilots Workshop, Willamette Aviation CFI James Neils will offer a look at "**When ADM Goes Wrong,**" and what outcomes pilots might expect when decision-making is faulty, or even entirely absent. James will present a handful of case-studies and get feedback from attendees, who also may have their own ADM stories to share as well. We're hoping to see you there!

DRIVE IN - Two miles south of Wilsonville, just off I-5. 1/4 mile south of Arndt Rd.

FLY IN - Taxi to the very north end of the Aurora airport. Park on the ramp between the fuel island and the FBO building. **AVOID OVERFLYING POPULATED AREAS.**
