

Second Saturday Seminar at Willamette Aviation

Pilots are likely to believe that their **risk** decreases with flight hours — as they build experience, they are more likely to avoid errors. However, experience can create another risk factor: complacency. At this month's **Second Saturday Seminar**, Willamette Aviation CFI Paul Glatts will discuss **Understanding the Risk Zone**, and what steps you should take to mitigate risk during your flight operations. Paul will review accidents that involved very experienced pilots who nonetheless made questionable decisions. He also will outline **Aeronautical Decision Making (ADM)** models and discuss his own personal rules for staying safe. Don't miss this one!
